Full-Stack Developer | Software Consultant | AI Enthusiast

PROFESSIONAL SUMMARY

Currently working as a Software Consultant at ITPlusPoint with expertise in .NET, React.js, SQL Server, and Generative AI technologies. Experienced in developing scalable enterprise applications, AI-powered platforms, REST APIs, automation systems, and responsive web applications. Passionate about building intelligent, high-performance systems that solve real-world business problems through modern technologies and AI integration.

EXPERIENCE

ITPlusPoint 2023 Nov – Present

Software Consultant *Khordha, Odisha, India*

- Working on full-stack software development using .NET Framework, ASP.NET MVC, React.js, SQL Server, JavaScript, and Generative AI technologies.
- Developed enterprise web applications, CRM systems, AI-powered platforms, and automation solutions for multiple business domains.
- Leveraged AI tools to improve productivity by 90%, enabling rapid development of 20+ chatbot POCs and faster project delivery.
- Mentored and led development teams, improving code quality, delivery efficiency, and team productivity.
- Mentored 500+ participants during a hackathon hosted by Srusti Academy of Management and received recognition for impactful mentorship.

PROJECTS

Green Parrot Organization & Brand Management System

- Developed CRUD modules for organization and brand management using ASP.NET MVC, SQL Server, JavaScript, and Bootstrap.
- Improved system stability through testing, debugging, and feature enhancements to improve user experience.

Society Life Society Management System

- Implemented modules for member registration, property management, and billing management.
- Ensured data integrity through backend validations and improved UI responsiveness and performance.

LeadGen AI Lead Generation Platform

- Built a lead generation platform using Google Search Console and Google Maps APIs for location-based and sector-wise lead extraction.
- Implemented filtering, Excel export, smart data handling, campaign targeting, and messaging functionalities.

Social Media Management System

- Integrated ChatGPT APIs for AI-powered content generation and workflow automation.
- Optimized application performance through debugging and testing.

MyCropCapital Agri Investment Platform

- Developed investment tracking dashboards and responsive interfaces connecting farmers and investors.
- Implemented project listing and real-time investment insights.

Blocks Investment Real Estate Platform

- Built commercial property investment modules with property listing, filtering, comparison, and investment insights.

- Designed responsive UI and optimized user workflows.

AI & Automation (POCs & Chatbots)

- Developed 100+ AI Proof of Concepts and built 30+ AI chatbots using multiple LLM APIs.
- Implemented prompt engineering, context-aware chat systems, document-driven AI workflows, and AI automation pipelines.

EDUCATION

Synergy Institute of Technology (SIT) 2023
Bachelor of Technology (B.Tech) *Bhubaneswar, Odisha*

Maharshi College of Natural Law 2019
12th *Bhubaneswar, Odisha*

Silpanchal Vidyalaya 2017
10th

TECHNICAL SKILLS

Backend: .NET Framework, ASP.NET MVC, Web API, C#, SQL Server, Entity Framework, REST APIs

Frontend: React.js, JavaScript, jQuery, HTML5, CSS3, Bootstrap, Responsive Design

AI & Automation: Generative AI, ChatGPT API, Prompt Engineering, AI Workflows, AI Chatbots, API Integration

Tools & Platforms: Git, GitHub, Postman, Visual Studio, VS Code, Vercel, Mocha Host

SOFT SKILLS

Communication Teamwork Leadership Mentoring Problem Solving Productivity
